

Mandatory Language for Public Notice
Triggered Source Monitoring and Reporting Violation
Ground Water Rule

Holiday Trav L Park **PWS 2330022** failed to collect the required number of triggered source bacteriological samples for fecal indicator monitoring of the ground water system during MAR 2018, SEPT 2010. This monitoring is required by the Texas Commission on Environmental Quality's "Drinking Water Standards" and the federal "Safe Drinking Water Act," Public Law 95-523.

Triggered source samples (raw water samples) are used to monitor water quality and indicate if the water is free of fecal indicator bacteria. Following a positive routine total coliform result in our distribution system, our water system is required to submit one triggered source sample for every active ground water well. Failure to collect all required triggered source samples is a violation of the monitoring requirements and we are required to notify you of this violation.

What is being done? We are taking the following actions to address this issue: In order to return to compliance our system had to collect a raw samples from Well G2330022A and it was collected on 01/09/2020 and Well B and it was collected on 12/02/2019 and we are no longer be in violation.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have any questions regarding this violation, you may contact:

Name of System Official: Breyvey Velazquez

Area code + phone number: 830-422-1573

Instructions for preparing the required Public Notice: Copy the mandatory language above and insert the underlined information in the spaces indicated. Please refer to the Certificate of Delivery or 30 TAC 290.122 for additional information on public notification.
